INTRODUCTION

Informations sur le produit / *Information about the product*

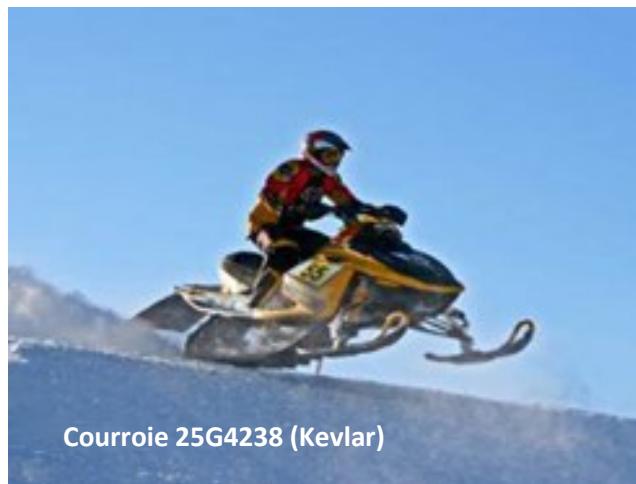

Les courroies sont des éléments flexibles qui permettent de transmettre la puissance lorsque l'arbre moteur et l'arbre d'entraînement sont éloignés l'un de l'autre. Par ailleurs, l'élasticité de ces éléments permet d'absorber des chocs et des vibrations, ce qui contribue à rendre la transmission silencieuse et à augmenter sa durée de vie.

Pour le bon fonctionnement des arbres, le choix des poulies est primordial dans une application donnée vu que les courroies sont fabriquées à partir de fibres. Une poulie trop petite pourrait donc endommager les fibres et affecter l'application.

Belts are flexible elements that transmit power when the driver shaft and the driven shaft are away from each other. Moreover, the elasticity of these elements makes possible the absorption of shocks and vibrations, which contributes to make the transmission silent and increase its service life.

For proper functioning of the shafts, the choice of sheaves is crucial in a given application since the belts are made from fibres. A sheave that is too small could damage the fibres and affect the application.

DIFFÉRENTS TYPES DE COURROIES

DIFFERENT TYPES OF BELTS

** Les manufacturiers de courroies cesseront prochainement la production des courroies Truflex. Le modèle Hi-Power II (A, B, C, etc.) prendra sa place.

The belt manufacturers will cease the production of Truflex belts in the near future. The Hi-Power II model (A, B, C, etc.) will replace it.

CARACTÉRISTIQUES DES COURROIES

Les courroies trapézoïdales (en V) Ex: B29

- Grande résistance à la traction due à leur mode de construction
- Bonne résistance au fluage dû aux propriétés des fibres de courroies (ex: faible rigidité)
- Bon rapport puissance/encombrement
- Tension réduite, bonne stabilité latérale
- Plus sujette à l'effet de la force centrifuge
- Meilleure adhérence, mais peuvent se coincer dans la rainure
- Plus lourde donc les vitesses seront moins élevées (5-10 m/s)
- Durée de vie raisonnable (bonne résistance à la fatigue et l'usure)

Les courroies rainurées Ex: BX90

- Combinent les avantages des courroies plates et trapézoïdales
- Par rapport aux courroies plates, la surface de contact est accrue, la tension radiale est donc réduite
- Par rapport aux courroies trapézoïdales, il y a un meilleur rendement en éliminant les blocages dans les rainures

Les courroies crantées Ex: 187L050

- Pour un rapport de vitesse constant, elles ont les mêmes caractéristiques que les engrenages
- Vitesses allant jusqu'à 80 m/s et une puissance jusqu'à 200 kW

CHARACTERISTICS OF BELTS

V-belts Ex: B29

- *High resistance to traction due to their type of construction*
- *Good resistance to flowing due to the properties of the belt fiber (ex: low rigidity)*
- *Good "power vs available room" ratio*
- *Decreased tension, good lateral stability*
- *More subjected to the effect of centrifugal force*
- *Better adherence, but can get caught in the groove*
- *Heavier, therefore the speeds will be lower (5-10 m/s)*
- *Reasonnable lifetime (good resistance to fatigue and wear)*

V-ribbed (cogged) belts Ex: BX90

- *Combine the advantages of both flat and V-belts*
- *When compared to the flat belts, the contact surface is increased. So, the radial tension is decreased*
- *In comparison to the V-belts, there is better performance by eliminating the sticking in the grooves*

Timing Belts Ex: 187L050

- *For a steady speed ratio, theses belts have the same characteristics as gears*
- *Speed up to 80 m/s and power up to 200 kW*

★ P= 25/32 & C=1/16 POUR LES ALÉSAGES DE 0 À 1" / FOR 1" BORE AND SMALLER

▲ NOTE—NE PAS UTILISER LES POULIES "AK" AVEC DES ALÉSAGES DE 1" ET MOINS AVEC DES CLASSIFICATIONS DE COURROIES GRIPNOTCH
NOTE—DO NOT USE THESE "AK" SHEAVES WITH BORES 1" AND UNDER WITH GRIPNOTCH BELT RATINGS

Chemin de clé standard / Standard Keyseat	
Plage d'alésage / Bore Range	Chemin de clé / Keyseat
1/2"	None
5/8" - 7/8"	3/16 x 3/32"
15/16" - 1 1/4"	1/4 x 1/8"
1 7/16"	3/8 x 3/16"

Voir p.11 pour caractéristiques des vis de pression
See p.11 for set screw specifications

Les poulies "AK" sont usinées avec précision à partir de fonte à grain fin, statiquement balancées, peintes et emballées individuellement. Elles sont fournies avec des chemin de clé standard et des vis de pression à tête creuse.

"AK" Sheaves are accurately machined from fine grained cast iron, statically balanced, painted and individually packaged. They are furnished with standard keyseats and hollow head setscrews

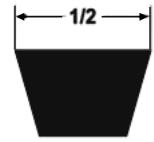

Section poulie/ Sheave section

Poulie en fonte AKH / AKH Cast Iron Sheave

Poulies à une rainure pour courroies de type «4L» ou «A»
Les courroies «3L» peuvent être utilisées avec ces poulies
comme indiqué dans le tableau ci-dessous.

Single groove sheave for "4L" or "A" Belts

*"3L" belts may be used with these sheaves as indicated in the
table below*

"T": Type. Le suffixe indique le type de construction: A= arms; B= block; W=web

Attention

Ne pas utiliser ces poulies en fonte avec des vitesses excédant 6500 pied/min.

"L", "H" & "E": Sheave dimensions vary according to shaft tolerance.

"B": Bushing type (see p.12 for the specifications)

"T": Type. Suffix indicates construction: A= arms; B= block; W=web

Caution

Do not use these grey cast iron sheaves with rim speeds in excess of 6500 feet/min.

"L", "H" & "E": Les dimensions des poulies varient en fonction de la tolérance de l'arbre

"B": type de manchon (Voir p.12 pour les caractéristiques)

"T": Type. Le suffixe indique le type de construction: A= arms; B= block; W=web

Attention

Ne pas utiliser ces poulies en fonte avec des vitesses excédant 6500 pied/min.

"L", "H" & "E": Sheave dimensions vary according to shaft tolerance.

"B": Bushing type (see p.12 for the specifications)

"T": Type. Suffix indicates construction: A= arms; B= block; W=web

Caution

Do not use these grey cast iron sheaves with rim speeds in excess of 6500 feet/min.

Section poulie/ Sheave section

Poulie à rainures combinées pour manchon conique de type «QD» A/B Combination for "QD" taper bushing

10 rainures / 10 grooves (Toutes les mesures sont en pouces / All measurements in inches)
